

A-T Selected for its Custom Design and Flexibility

The Client

NY State Aerospace Client

The Challenge

- Zero leakage at extremely high flows under full vacuum

The Solution

**A-T Series 8R
(18) 1/4" - 1" 3-piece
Automated Ball
Valves**

When our client needed new equipment to assimilate space conditions they turned to the expertise of R.M. Headlee Valves & Controls and the proven performance of A-T ball valves. The requirement was to test a multitude of gases under full vacuum and extremely high flows in an aerospace wind tunnel utilizing automated ball valves. A-T was able to provide "leak free" valves by specially machining the seat configuration and re-engineering the packing design. By working with their clients and vendors R.M. Headlee was able to provide 100% customer satisfaction and on-time project completion.

The Result

- Leak free valve
- On-time completion
- 100% Satisfaction
